The Suntown Therapy Machine helps relieve all the conditions above!

Thousands of Australians live with pain everyday. According to a recent study, 20% of Australians are living with chronic pain. The cost to the Australian economy is 15 to 20 billion dollars a year. For some,

living with pain can be a huge challenge. Up to 90% of people who suffer pain contemplate suicide. Anger, anxiety, depression and frustration are common among sufferers particularly when the cause of the pain cannot be diagnosed. This mental and physical torture often leads to breakdown of marriages and other close relationships.

Many sufferers of pain are caught in the "Pain Cycle". Pain causes a person to become tense. Anxiety can intensify the pain. Tension in the muscles can intensify the pain. Increased pain can disrupt sleep. Lack of sleep causes fatigue, anxiety, tension and stress. Continual fatigue, anxiety, tension, and stress can cause depression. Depression in turn can cause the physical pain to worsen. The cycle continues...

Our goal at The Health Place is to help break the pain cycle. Even if the pain is alleviated for only a few minutes, it gives the sufferer a rest from the pain emotionally.

The Suntown Therapy Machine Helps Break The Pain Cycle!

The Suntown Therapy machine is an effective product to increase blood

circulation and help overcome pain that is either acute or chronic. This machine is like having your own medical doctor available whenever you experience pain and discomfort! Now you can do something about your pain with this portable and easy to use therapy unit. Use it while you sit and watch TV!

How The Suntown Therapy Machine Works.

According to Traditional Chinese Medicine, Chi (or the Life Force) flow along channels in the body. When the channels become blocked, disease, discomfort and pain are experienced. The Suntown Therapy Machine works by massaging the affected area and opening the channels. This form of therapy is akin to having an acupuncture treatment but without the needles! This therapy machine has passed all safety tests required by the relevant Australian health authorities. It will relieve your pain naturally without any side effects.

We offer a 7 Day Money Back Guarantee for the Suntown Therapy Machine.

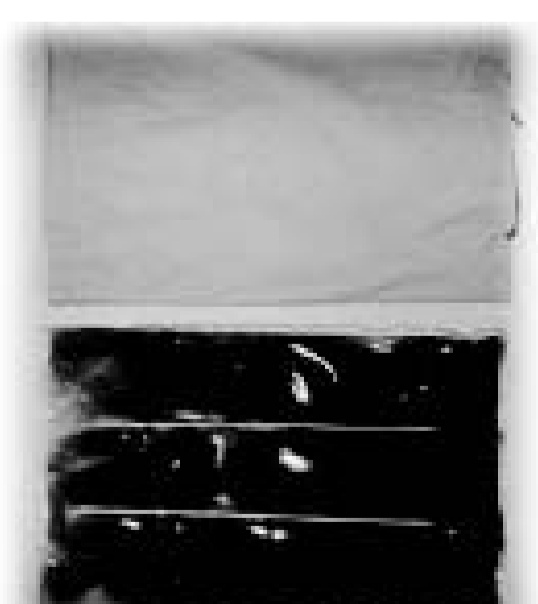

If you are not satisfied with this fantastic machine, return it to the place of purchase, within 7 days of payment, and your money will be refunded in full.
